

SKORPIES combine brilliant design with unsurpassed stability and style to provide maximum fun and safety for junior skaters. Embracing all the quality design features, functionality and worldwide design patents of the popular Skorpio™ Skates - SKORPIES have been specifically scaled down with extra emphasis on quality and safety, to provide the ultimate skating experience for children aged five to eight. As well as providing a fun physical activity that will help your child develop confidence and become more aware of how their body moves - SKORPIES will provide your child with lifelong balance and coordination skills that will help them progress and master other physical activities.

## ➤ Design Features

### Unsurpassed Stability

SKORPIES' low centre of gravity makes them extremely easy to balance on, giving the young novice skater confidence to learn.

### Wear Your Own Shoes

SKORPIES have been specifically designed to use with a child's favourite comfortable footwear. Simply strap on and go!

### Adjustable Footplates

SKORPIES grow with the child and allow children to share their skates with siblings and friends. The footplate adjustment nut has been especially designed for children to use. SKORPIES adjust to shoe sizes US13J - US3½

### Dual Braking System

Dual non-marking rubber brakes are fitted to the back of both skates for maximum safety.

### Increased Rolling Resistance

80mm 78A PU wheels combined with ABEC 1 bearings further advance SKORPIES safety features by giving optimum control of the rolling speed.

### Wheel nuts

In keeping with SKORPIES' contemporary automotive design, a threaded domed wheel nut complete with an allen key fitting gives added safety with the look of a hub cap.
